

NPI – New Product Information

Aluminum Electrolytic Capacitors

Series: HH

High Temperature 125°C, High Voltage 400 to 450V

Mounting:
Snap-In type

Voltage Range:
400VDC up to 450VDC

Capacitance Range:
600µF up to 33000µF

Endurance:
4000h @ 125°C

Features:

- AEC-Q200 qualified
- Small size & high reliability
- Resistance to high temperature max. 125°C
- High ripple current capability
- 2-pin, 3-pin and Multipin terminals available

Applications:

- Automotive Electronics
- Interleaved PFC circuits
- Output filter in isolated full bridge DC/DC converters
- DC link in Solar PV inverters and UPS systems
- Frequency converters
- PFC in high end power supplies
- DC link in high reliable industrial motor drives

Compliance:

- RoHS & REACH
- Halogen Free
- JIS-C-5101-25

Production Status:

- Mass Production
- Samples available
